

COSMETIC INSIGHTS

Navigating Cosmetics Trends and Consumer Insights with Tableau

Project Demonstration

Maheswar Reddy Kathithatagari (Team Lead) • Vijay Kumar Gogula • Yagna Mekala • Joshna Vutupalli • Guggulla Sree Pranavi

The Problem

Brand and category managers juggle brand, price, rank, and skin-type data across disconnected spreadsheets — making pricing and marketing decisions slow, manual, and inconsistent.

No connected view

Brand, price, rank, and skin-type data live in separate sheets

Hours lost manually

Every review means re-compiling reports from scratch

Blind spots on skin type

No easy way to see which segments are under-served

Persona

Priya

Brand & Category Manager

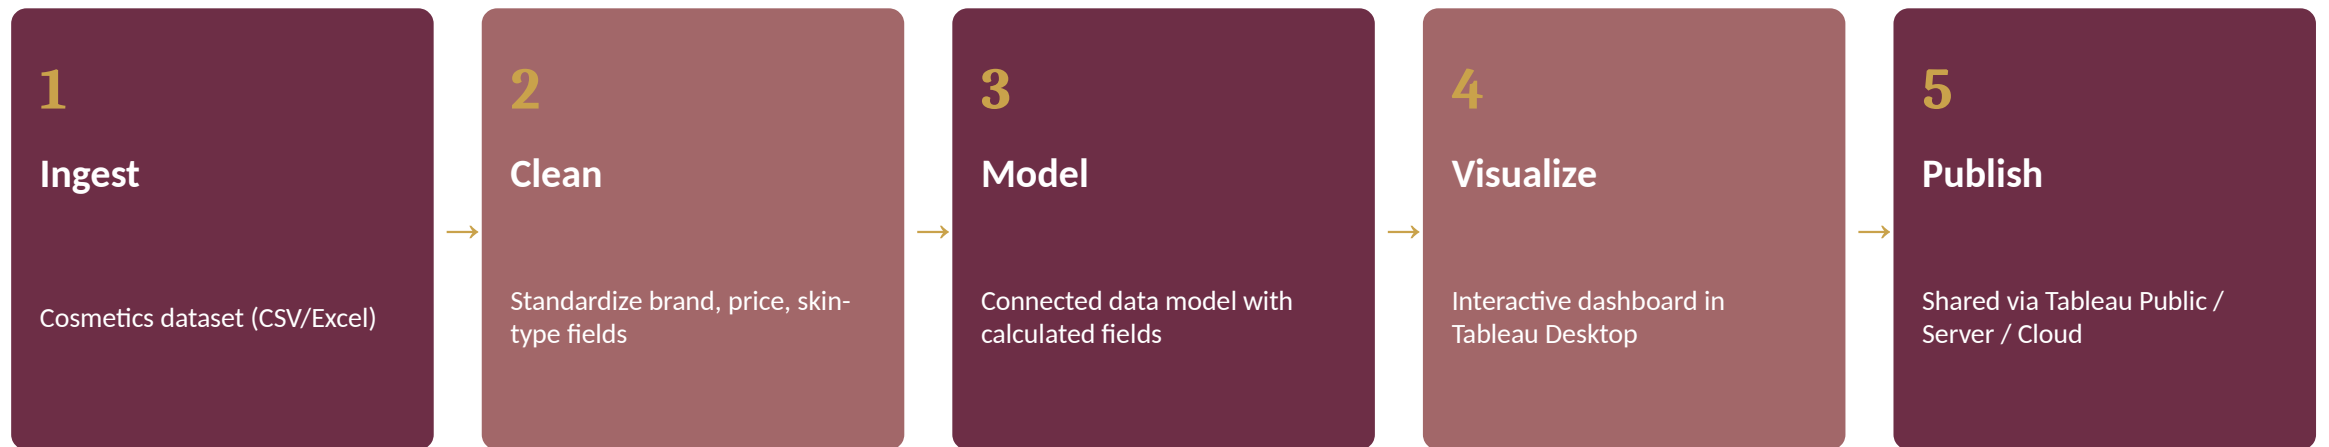

"I don't have time to dig through five spreadsheets before every review. I need to know which products are overpriced for their ranking."

Before: overwhelmed, time-pressured

After: confident, in control

The Solution

Cosmetic Insights is an interactive Tableau dashboard that connects brand, price, rank, and skin-type data into one filterable view — turning hours of manual reporting into minutes of exploration.

Built for Brand & Category Managers, Analysts, and Leadership at cosmetics companies who need faster, evidence-backed decisions.

Key Features

1

Brand & Pricing Analysis

Compare brand performance by price and rank; spot top and bottom performers

2

Skin-Type Segmentation

Filter and view coverage across Dry, Oily, Combination, Normal, Sensitive

3

Interactive Filters & Drill-down

Global filters plus drill-down from category summaries to products

4

Role-Based Access

Separate views for Analysts and Leadership on Tableau Server/Cloud

5

Trend & Insight Reporting

Trend charts across categories and price bands over time

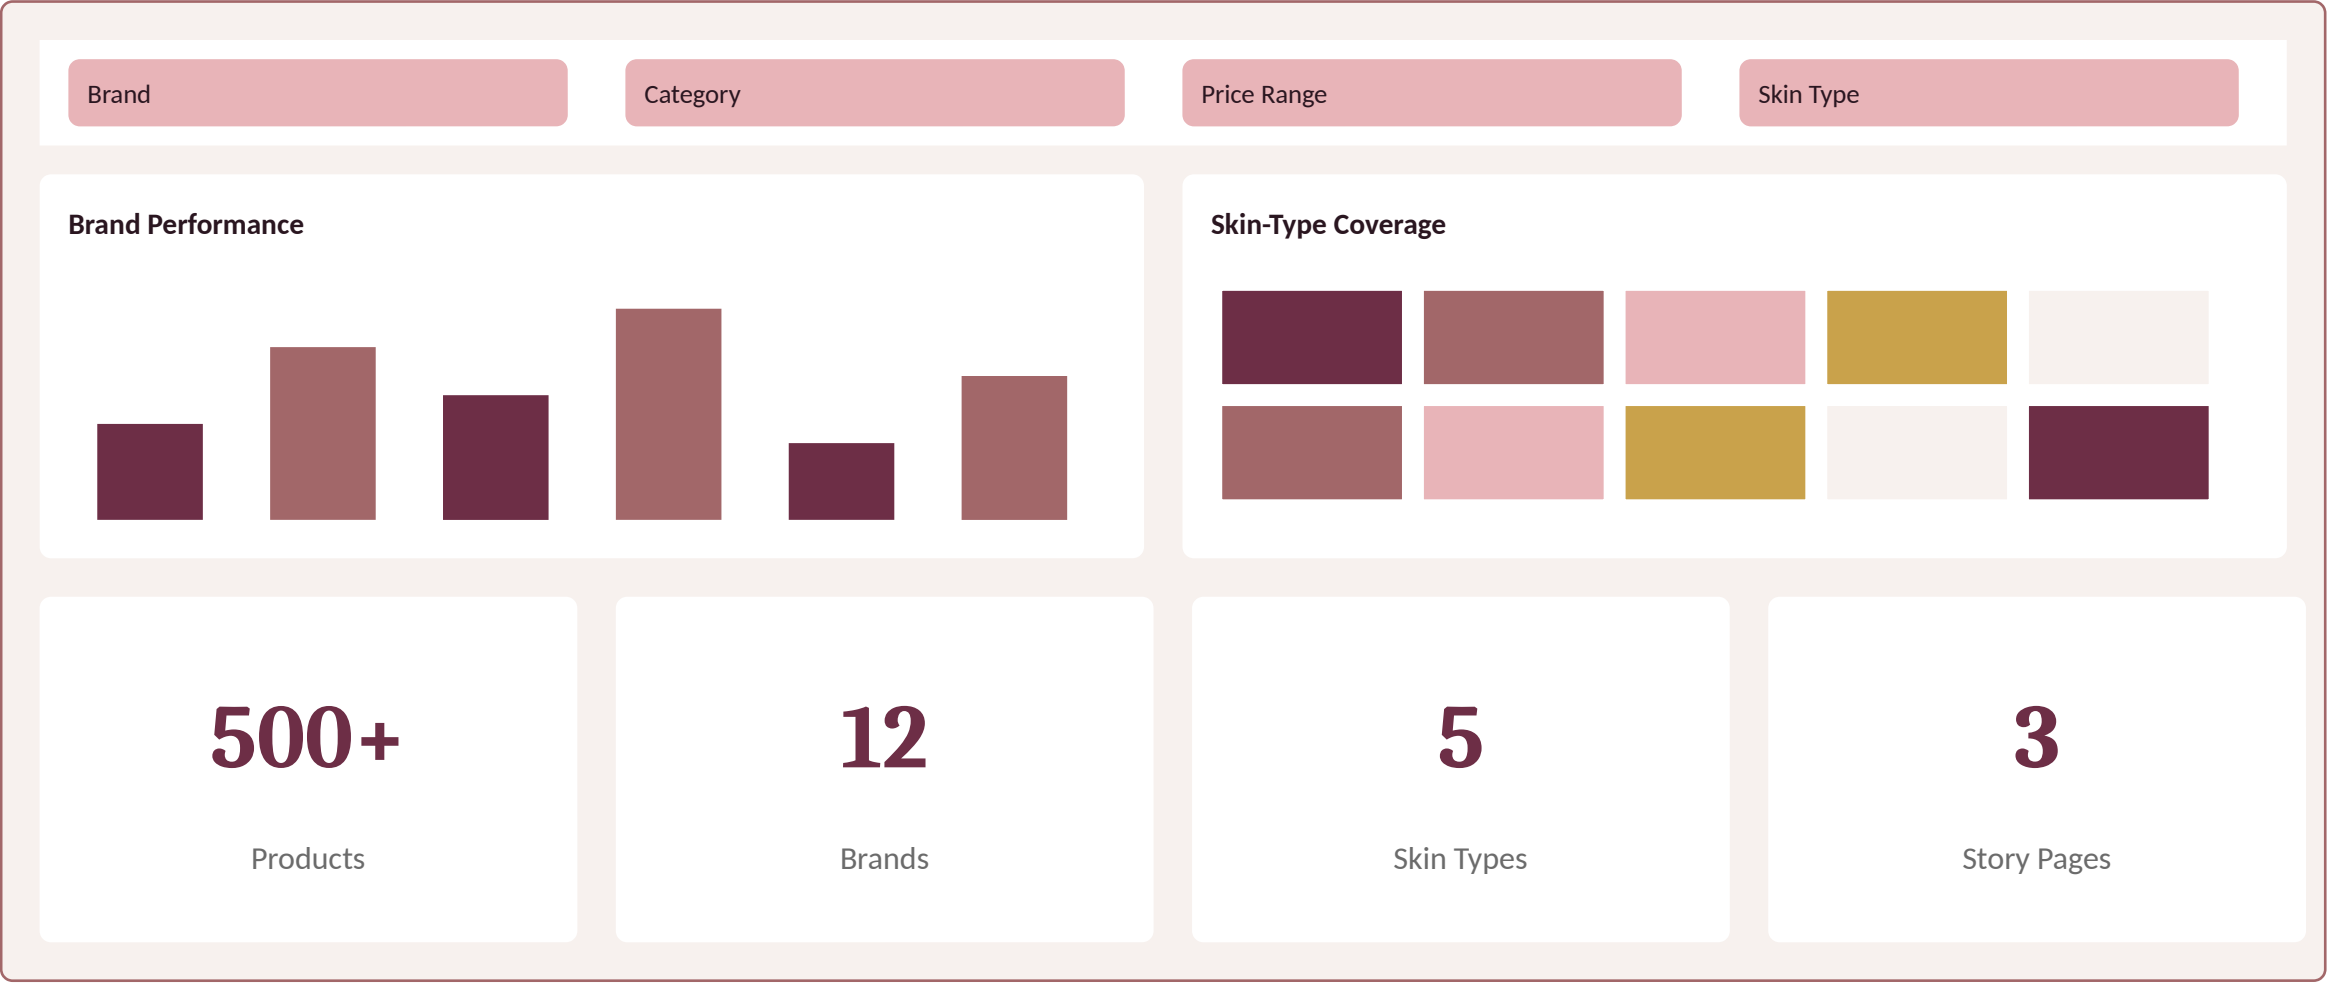

6

Export & Reporting

Download dashboard views as PDF/image for review meetings

Dashboard Preview

Bugs Found & Resolved

What we verified:

- ✓ Dataset renders correctly with all fields typed
- ✓ Filters work across brand, category, price, and skin type
- ✓ Drill-down and role-based access behave as expected
- ✓ Dashboard export produces a usable PDF report
