Customer Problem Statement Template

A problem statement is created to understand the customer's point of view, keeping the team focused on what matters most when designing the experience.

A well-articulated problem statement helps the team find the ideal solution for the challenges customers face, and builds empathy for how they perceive the product or service.

Cosmetic Insights — Problem Statements

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a Brand & Category Manager at a cosmetics company	identify which products and price segments perform best across skin types	the data on brand, price, rank, and skin-type sits in separate, disconnected sheets	there is no single dashboard that brings these attributes together	overwhelmed, and unsure whether pricing and marketing calls are truly evidence-based
PS-2	a Data/Market Analyst supporting the marketing team	spot emerging trends in consumer preference across cosmetic categories	I have to manually clean and cross-reference the raw dataset before I can analyze it	the data isn't pre-processed or visualized for quick pattern recognition	slowed down and behind on delivering timely insights to stakeholders
PS-3	a shopper looking for cosmetic products suited to my skin	find products that match my skin type at a reasonable price	product rank and skin-suitability info are hard to compare across brands	there's no simple visual way to filter and compare products by skin type and price	uncertain, and more likely to end up with an unsuitable purchase
