Project Tracker, Velocity & Burndown Chart

Sprint	Total Story Points	Duration	Sprint Start Date (Planned)	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	16	6 Days	22 Jul 2026	27 Jul 2026	16	27 Jul 2026
Sprint-2	16	6 Days	29 Jul 2026	03 Aug 2026	16	03 Aug 2026

Velocity

Following the same Sprint / Epic / Story / Story Point logic used to plan the backlog above:

- Total Story Points (Sprint-1 + Sprint-2) = 16 + 16 = 32
- Number of Sprints = 2
- Velocity = Total Story Points ÷ Number of Sprints = 32 ÷ 2 = 16

The team's velocity is 16 Story Points per Sprint, matching the planned pace for both sprints.

Burndown Chart

A burndown chart is a graphical representation of work left to do versus time. For Cosmetic Insights, each sprint's remaining story points (starting at 16) are tracked daily across the 6-day sprint duration and should trend down to 0 by the planned end date.
