

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	22 July 2026
Team ID	
Project Name	Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	4 Marks

Functional Requirements

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Upload & Preprocessing	- Upload cosmetics dataset (CSV/Excel) - Clean & standardize brand, price, rank, skin-type fields - Handle missing or inconsistent values
FR-2	Brand & Pricing Analysis	- Compare brand performance by price and rank - Visualize price distribution by category - Highlight top and bottom performing brands
FR-3	Skin-Type Segmentation	- Filter products by skin type (Dry, Oily, Combination, Normal, Sensitive) - Show skin-type coverage across brands and categories - Cross-analyze skin type with price range
FR-4	Interactive Dashboard & Filters	- Global filters for brand, category, price range, and skin type - Drill-down from category summary to individual products - Export dashboard views/reports as PDF or image
FR-5	User Access	- Role-based dashboard views (Analyst view vs. Leadership summary view) - Secure login via Tableau Server/Cloud
FR-6	Trend & Insight Reporting	- Trend charts across categories and price bands - Automated highlight of significant shifts or outliers

Non-functional Requirements

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Clean, intuitive dashboard layout with consistent colors and labeling so both analysts and leadership can read insights without training.
NFR-2	Security	Role-based access control and secure authentication on Tableau Server/Cloud; sensitive pricing data restricted to authorized users.
NFR-3	Reliability	Dashboard consistently reflects the latest uploaded data with no data loss or corruption during refresh.

FR No.	Non-Functional Requirement	Description
NFR-4	Performance	Dashboard views and filters respond within 2-3 seconds even when working with the full cosmetics dataset.
NFR-5	Availability	Dashboard accessible via Tableau Public/Server/Cloud with minimal downtime during scheduled data refreshes.
NFR-6	Scalability	Design supports a growing dataset (more brands, categories, or regions) without needing a dashboard redesign.
